

Why use TriPod instead of the newcomer?

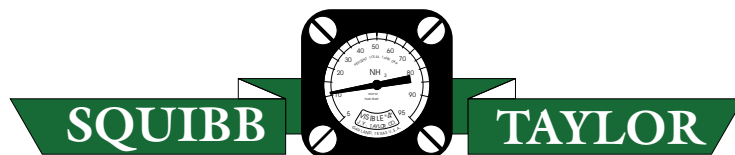

- Tripod flow rates are AS ADVERTISED so your load out time will not increase. In fact, our TP7 flows 50% more product at 10 psi than the competition.
- Tripod will disconnect with the **SAME FORCE ALL THE TIME** regardless of system pressure.
- Tripod will never damage your riser or hose with high breakaway loads.
- Tripod does not use paper thin wall sections in its design.

BE SAFE!

**Use the safety coupler you can count on.
Proven effective in thousands of installations
and hundreds of pull away incidents.**

***When it comes to safety,
you might not get a second chance.***
