

# SAFETY STROKE

Mounted on  
1-1/4" ESV

Mounted on  
3" ESV

ESV not included

## Features:

- All critical components constructed with durable, corrosion resistant **stainless steel**
- A perfect fit for the Fisher® N550 Emergency Shutoff Valve series
- The ME551 Safety Stroke is designed to fit all ESV sizes
- Features the Airstroke® Actuator by Firestone
- Utilizes existing Fisher® thermal device
- Features the same robust tubular design as the Marshall Excelsior ME205 with smooth-acting cam and heavy return spring
- Allows ESV to completely open ensuring full flow
- Easy to install without modification
- Operating Pressure Limits: Minimum - 20 PSIG  
Maximum - 125 PSIG  
Recommended - 20-25 PSIG
- Temperature range -60° F to 250° F
