

CHOCK BLOCK HOLDER

Application:

Designed to provide a durable and convenient receptacle to store chock blocks during over-the-road transit. This holder can be mounted to the vehicle fender housing, frame, or any other flat bearing surface with enough area to accommodate (2) ME200 chock blocks side by side. It can easily be changed to accommodate left or right hand draw bar activation for the operators convenience. Optional  Smart Interlock Technology is available for direct connection to Allison® Automatic Transmissions through the “Auxiliary Function Range Inhibit”, braking systems for manual transmission trucks, or through the truck pumping system.  Smart Interlock Technology prevents the truck from being operated while the holder’s draw bar is in the off position, thereby preventing truck operation without the use of wheel chock blocks. This also prevents the driver from accidentally leaving behind expensive wheel chock blocks.

Features:

- All aluminum & stainless steel construction
- Molded anti-vibration rubber bumpers to prevent incidental damage to chock blocks
- Universal draw bar handle for right or left hand applications
- Supplied with all mounting hardware & fasteners
- Available with optional  Smart Interlock Technology
 - Interlock technology features “potted” Turck® proximity switch for maximum weather resistance and security against vibration
 - Supplied with water tight conduit & necessary wiring hardware to reach 5' below deck with water tight receptacle plug
 - Optional wiring harness cable kits available in 20' or 30' lengths

Part #	Description
ME200B	Chock Block Holder
ME200PIB	Chock Block Holder with  Smart Interlock Technology
ME200BK	Chock Block Holder Kit with (2) ME200 Chock Blocks
ME200PIBK	Chock Block Holder Kit with  Smart Interlock Technology & (2) ME200 Chock Blocks
Accessories	
Part #	Description
ME200EXT	3" Standoff Extension Kit for Chock Block Holder
MEP801PC/20	20' Smart Interlock Cable w/ Water Tight Receptacle Plug - Only
MEP801PC/30	30' Smart Interlock Cable w/ Water Tight Receptacle Plug - Only
MEP801PCK/20	Complete 20' Smart Interlock Cable Kit w/ 1 Relay / LED Power Indicator / Inline Fuse
MEP801PCK/30	Complete 30' Smart Interlock Cable Kit w/ 1 Relay / LED Power Indicator / Inline Fuse
MEP802PCK/20	Complete 20' Smart Interlock Cable Kit w/ 2 Relays / LED Power Indicator / Inline Fuse
MEP802PCK/30	Complete 30' Smart Interlock Cable Kit w/ 2 Relays / LED Power Indicator / Inline Fuse
MEP803PCK/20	Complete 20' Smart Interlock Cable Kit w/ 3 Relays / LED Power Indicator / Inline Fuse
MEP803PCK/30	Complete 30' Smart Interlock Cable Kit w/ 3 Relays / LED Power Indicator / Inline Fuse
